

NCSR, VSO and MDF-PI offer a wide range of short training courses in Corporate Social Responsibility (CSR)

WHY CSR?

NCSR, VSO and MDF-PI see a growth of social entrepreneurship in Indonesia as businesses are driven by the urge from the local and global level to become more social and environmental oriented. Also an increasing number of businesses realise that an effective CSR strategy can demonstrate commitment to the community and build trust in their brand, develops employee's professional skills and enhance corporate culture and recruitment and retention of talented employees.

COURSES FOR WHOM?

The CSR and sustainability training courses are developed to assist managers and CSR practitioners from different sectors to strengthen skills and practical insights they will need to embed and integrate environmental, social and governance issues into their business and organisation strategy, to lead organisational change and embed sustainable practices.

Who are we?

The National Center for Sustainability Reporting (NCSR) is a Non Profit Organisation based in Jakarta and a GRI Certified Training Partner since 2011. Its main goal is to develop and improve the use of Sustainability Reporting. VSO Indonesia will provide specialist support to corporate organisations to add value to their CSR initiatives. MDF Pacific-Indonesia (MDF-PI) brings in practical methods and tools to provide participants with the skills to develop effective CSR strategies. MDF-PI also runs a particular training to get the Corporate Sector acquainted with Project Management and Community Development.
